

Nebulizers, Compressors & Medications

Small nebulizers produce a mist to be inhaled. The inhaled medication is deposited within the lungs. You should inhale slowly and pause long enough to allow the medication maximum time to deposit in the lungs.

ALWAYS KEEP A SPARE NEBULIZER KIT! CALL Medical Service Company FOR A REPLACEMENT AS SOON AS YOU USE YOUR BACK-UP NEBULIZER.

Therapy Instructions

1. Wash hands with soap and water before using machine.
2. Turn machine off.
3. Plug machine into wall outlet.
4. Put medications into nebulizer cup.
5. Turn compressor on.

Nebulizer Medications

Medical Service Company Pharmacy can help manage all your respiratory medications for COPD & Asthma. Speak directly to a pharmacist to receive your medication consultation and align your respiratory medications. Contact us at (877) 373-3455 to get started with filling your nebulizer prescription.

Treatment Instructions

1. Sit up comfortably. Hold mouthpiece between lips, or attach face mask. Keep nebulizer level or medication will run out of vial.
2. Breathe in and out through your mouth, not through your nose.
3. Exhale completely before treatment is started.
4. Using the mouthpiece, inhale slowly until you have a deep breath.
5. Hold your breath for approximately three to four seconds to allow medication to deposit in lungs.
6. Exhale slowly and completely.
7. Pause for a few seconds.
8. Inhale slowly and repeat steps 4-7.
9. Repeat this until all medication is gone.
10. You may stop and rest during the treatment, but turn off compressor so you don't waste the medication.
11. If you have to cough, just remove mouthpiece or mask.

Cleaning Supplies

- Water
- Alcohol
- Small Wash Basin and Bottle Brushes
- Household Detergent (Joy)
- Paper Towels
- White Distilled vinegar

Cleaning Suggestions

- Before handling any of your equipment, wash hands well with soap and water.
- Do not keep compressor on floor.
- Clean compressor daily by wiping with alcohol.
- Do not block air inlets on outside of compressor.
- Keep the compressor at a higher level than hose coming from it.

Cleaning Instructions

1. Take hose off nebulizer.
2. Take nebulizer apart.
3. Wash all nebulizer pieces in hot soapy water (Joy)
4. Rinse well with clear water.
5. Soak all pieces in 50/50 mixture of white distilled vinegar and water solution for ½ hour.
6. After soaking, take nebulizer pieces out of vinegar and water solution.
7. Rinse well with clear water and allow to dry on a clean paper towel.
8. When dry, reassemble and store in a clean plastic bag.
9. Solution may be reused for one week if kept covered in refrigerator.
10. The tube from the compressor to the nebulizer should not have to be cleaned. If it becomes cloudy inside it should be disposed of immediately and replaced with a new one.
11. Call Medical Service Company for additional tubing.

Warranty

If you have purchased the nebulizer compressor, your warranty is for 5 years. The disposable nebulizer administration set (cup, mouthpiece, and tubing) does not carry a warranty. If you are renting the nebulizer, your warranty is for the length of the rental period.
